

What are COPD and Bronchiectasis?

Common Impact:

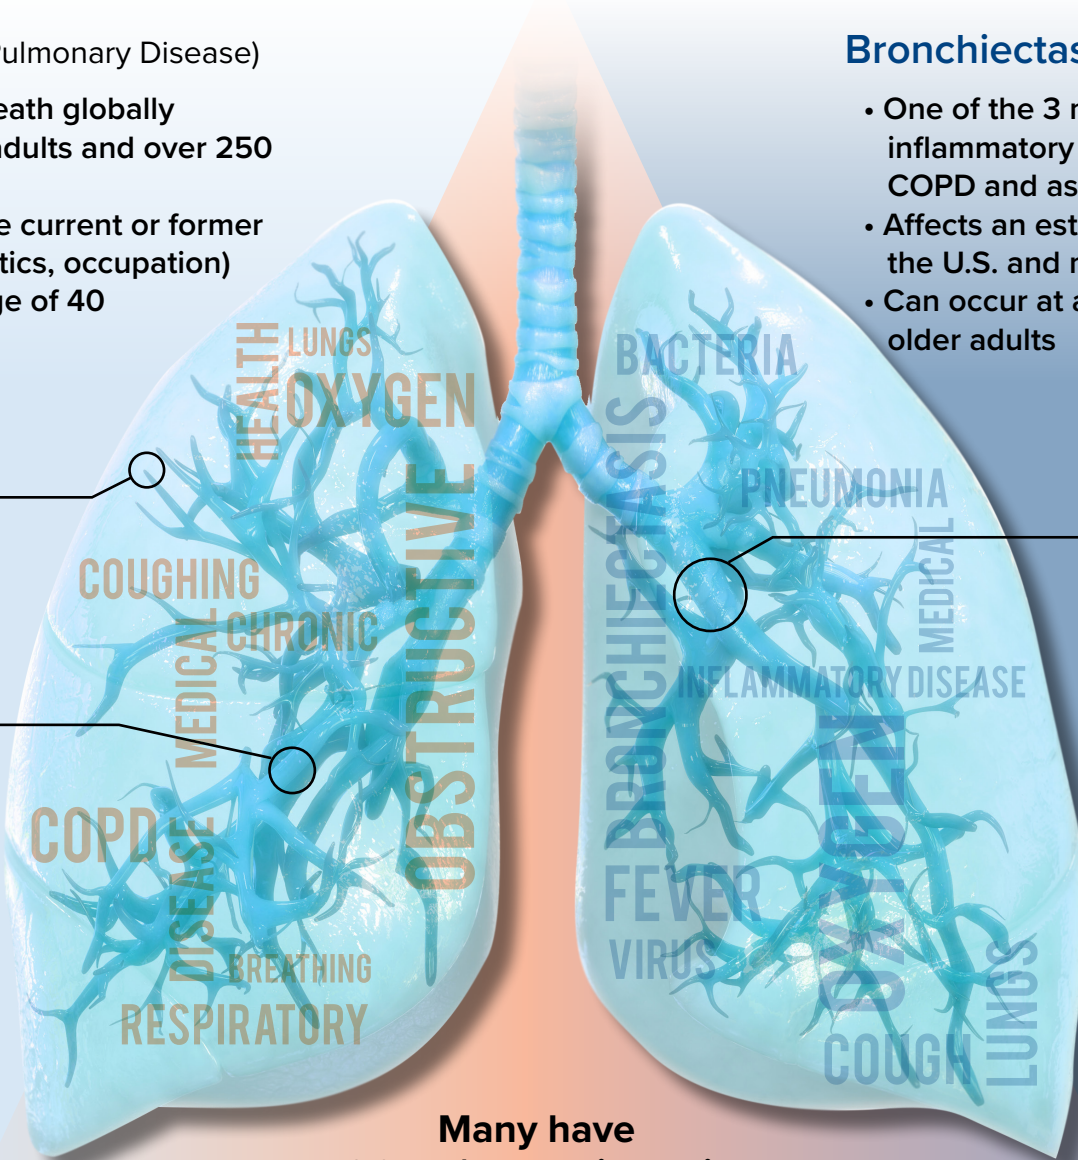

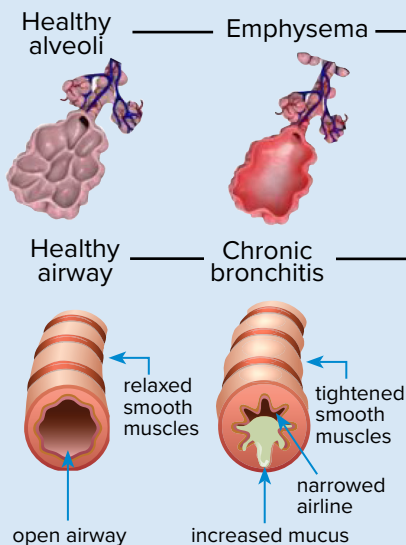

Symptoms - Frequent Infections - Disability

COPD (Chronic Obstructive Pulmonary Disease)

- The third leading cause of death globally
- Affects over 30 Million U.S. adults and over 250 Million globally
- Not all people with COPD are current or former smokers (environment, genetics, occupation)
- Often diagnosed after the age of 40

Bronchiectasis

- One of the 3 most common chronic airway inflammatory diseases globally (along with COPD and asthma)
- Affects an estimated 350,000 to 500,000 in the U.S. and millions globally
- Can occur at any age, but most often occurs in older adults

Many have
